

Did you know that more than 50% of the water we use at home is on the garden?

The great news is that we can enjoy a beautiful garden at the same time as using water wisely and observing local water restrictions.

- 💧 The best time to water your garden is before 10am and after 4pm when the sun's rays aren't so strong.
- 💧 Always use a trigger nozzle so no water is wasted.
- 💧 Plant water-conservative plants and use only enough water to match the needs of the plants.
- 💧 Using mulch helps save water by keeping soil cool to reduce evaporation by 75%.
- 💧 Save water – Save Money.

Be waterwise in your garden.
