

Advice

IS YOUR TOILET LEAKING?

A continuously running toilet can waste up to 96,000 litres of water per year.

That's a lot of water, so if your toilet is leaking at home or at work let someone know or get it fixed!

A leaking toilet is often a result of a deteriorating rubber valve in the cistern. It's easy to check for toilet leaks, but you may need a licensed plumber to fix the problem.

Watch the 'How to' guides on the Smart WaterMark YouTube Channel to see how you can check for leaks and start saving water and money straightaway.
